

Cryo Cafe

CryoCafe's enigmatic design & vision was ideated based on the widely unknown key to Cryotherapy - transcending the mind from focusing on the physicality of feeling cold. The name "cafe" is evocative of a daily practice recognized internationally, such as getting coffee. Our goal is to make – what has in the past been a medical treatment - available to everyone. We want to empower clients to become our "regulars" while consistently bettering themselves. All in the same amount of time it takes to grab a cup of coffee. Thus, we created an environment evocative of warmth, vacation, & escape.
